

SAKSHM KAUSHIK

CYBER SECURITY | VAPT | MOBILE & WEB APPLICATION SECURITY

Sakshmkaushik96@gmail.com +91 8630922242 Noida, UP LinkedIn Portfolio

OBJECTIVE

Cybersecurity professional with practical experience in web application security testing, vulnerability assessment, and VAPT reporting. Familiar with Burp Suite, OWASP Top 10, reconnaissance, and manual security testing, with additional hands-on practice through PortSwigger and TryHackMe labs. Seeking a Web Application Security or VAPT role to apply my skills, strengthen my technical expertise, and contribute to identifying and mitigating security vulnerabilities.

WORK EXPERIENCE & INTERNSHIPS

- **Web Application Security Tester | Sky Wave** **Aug 2025 – Present**
  Meerut, Uttar Pradesh | Hybrid
  - Test website security, identify vulnerabilities, support remediation, protect customer data stored in databases.

- **VAPT Intern | Securium Solutions Pvt. Ltd.** **Sep 2026 – Oct 2026**
  Noida, Uttar Pradesh | On-site
  - Worked on authorized Web Application VAPT and security assessments for government and private projects.
  - Perform authorized web application VAPT, reconnaissance, enumeration, and manual vulnerability testing.
  - Document findings with evidence, impact, and remediation recommendations.

- **Cyber Security Intern | Codec Technologies Pvt. Ltd.** **Oct 2025 – Jan 2026**
  West Chandivali IT Hub, Powai, Mumbai | Online
  - Completed a 3-month AICTE & ICAC-approved internship covering cybersecurity fundamentals, VAPT, security testing, and vulnerability reporting.

SKILLS

- **Web Application Testing:** OWASP Top 10, SQL Injection, XSS, XXE, Authentication, Authorization, Access Control and Security Misconfiguration.
- **API Security Testing:** REST API testing with Burp Suite and Postman. OWASP API Top 10 basics: BOLA/IDOR, broken authentication, excessive data exposure, mass assignment, rate limiting.
- **Burp Suite:** Proxy, Repeater, Intruder, HTTP Request/Response Analysis and Manual Testing.
- **Reconnaissance & Enumeration:** Nmap, Gobuster, Nikto, cURL, Service Enumeration and Web Technology Identification.
- **Vulnerability Assessment:** Vulnerability Identification, Validation, Risk Assessment, Evidence Collection and Remediation Recommendations.
- **VAPT Reporting:** Vulnerability Documentation, Impact Analysis, Proof of Concept (PoC) and Professional VAPT Reports.
- **Linux & Kali Linux:** Linux Administration, File Permissions, SSH, Bash Basics, Networking Commands and Security Testing.
- **Network Security:** TCP/IP, DNS, DHCP, NAT, ACL, Firewalls, Network Segmentation and Basic VPN Concepts.
- **Networking:** Subnetting, VLAN, Inter-VLAN Routing, Static Routing, Basic OSPF, STP and Port Security.
- **Security Tools:** Nmap, Burp Suite, Nessus, Metasploit, Wireshark, Gobuster and Nikto.
- **Programming & Scripting:** Python, Bash, PHP and Dart (Flutter Basics).
- **Mobile Application Security (learning, hands-on started):** Android app testing basics. Traffic interception with Burp, static analysis of APKs, OWASP MASVS/MSTG concepts.

PROJECT

- **Government Web Application VAPT – Confidential Client | Securium Solutions**
  • Performed web application VAPT, reconnaissance and manual security testing.
  • Identified OWASP Top 10 issues including XSS, SQL Injection and information disclosure.
  • Documented vulnerabilities with evidence, impact and remediation recommendations.
- **Engineering Express – Secure Educational Web & Mobile Application**
  • Developed Flutter-based application with authentication and secure digital notes access.
  • Implemented device binding, protected PDF viewing and access restrictions.
  • Tested authentication, authorization, API requests and application security using Burp Suite.
- **Web Application VAPT – OWASP Security Testing Lab**
  • Performed manual testing for SQL Injection, XSS, Authentication and Access Control.
  • Used Burp Suite Proxy, Repeater and Intruder for request analysis and testing.
  • Prepared vulnerability reports with PoC, impact and remediation.
- **Web Reconnaissance & Vulnerability Assessment Lab**
  • Performed reconnaissance and enumeration using Nmap, Gobuster, Nikto and cURL.
  • Identified exposed services, directories, endpoints and security misconfigurations.
  • Documented findings and prepared structured VAPT assessment reports.

EDUCATION

Qualification	Institute / University	Duration	Result
B.Tech — Computer Science & Engineering	Dr. A.P.J. Abdul Kalam Technical University	2022–2026	7.09 CGPA
ITI — Electronics Mechanic	Government ITI, Kharkhauda, Meerut, UP	2018–2020	75%
Senior Secondary (12th)	Tagore Shiksha Sadan, Hapur, UP	2017–2018	62%
Secondary (10th)	Shanti Swarup Krishi Inter College, Hapur, UP	2015–2016	73%

CERTIFICATIONS & LAB'S

- **VAPT Engineer Intern – Certification –** Securium Solutions Pvt. Ltd.
- **CyberPeace Dialogue Volunteer |** IIIT Delhi
- **Cyber Security Internship –** Codec Technologies Pvt. Ltd. (AICTE Approved)
- **Ethical Hacker Course –** Cisco Networking Academy
- **Cybersecurity Essentials –** Cisco Networking Academy
- **Introduction to Networks (CCNA Fundamentals) –** Cisco Networking Academy
- **Practical Ethical Hacking –** TCM Security
- **Ethical Hacking, Cloud Computing & System Design –** Tutedude
- **Cybersecurity Analyst Job Simulation – Tata |** Forage
- **Cyber Job Simulation – Deloitte |** Forage
